

## H2YR helps update single family 80's style home.

### About H2YR

Handyman 2 Your Rescue is a handyman service company in St. Cloud, Minnesota. Tom brings over 40 years of handyman experience, ranging from painting to flooring and more.

### Quick Facts:

- Changing the trim increases the cosmetic value of your home and adds appeal.
- Most common updated types of trim:
  - Window Casing
  - Door Casing
  - Baseboard

### Background

A St. Cloud resident had a single family home that was built in the 80s and he wanted to do some repairing. He wanted to remove all interior door and bi-fold doors (13 total) with new white doors and casement. In addition, he wanted white base cove and painting done on all the window's casement trim. He had started on this project, intending to do it by himself, but after removing the trim, he realized he needed help.

### Challenge

The project had several logistical and functional challenges to overcome. The first step was properly transporting the doors to the client and removing original doors and trim. What made this task difficult was the house. The bi-fold door had shifted over the years due to a raised floor in the center of the house. The door would not shut properly and trim was shifted. For the floor, much of the furniture and appliances had to be moved to apply 3 ¼" base cove.

### Solution

I made sure to take proper care, noting all potential issues before installation. I picked up and installed the interior doors and bi-fold doors, working carefully around the raised floor on the bi-fold door set. Once all the doors were in, I was able to work on the base cove and trim installation for doors and windows. Finally, finishing up the project with the painting and taking care to cover appropriate areas like walls, carpet, and flooring.

### Results

Communicating with the client throughout the entire process, the client's worry and stress disappeared. Within two weeks, the entire project had been completed and the home had been completely transformed. The client was pleased with the results and my communication process throughout the project.

Old interior doors and trim

New paint and trim casing
